

# SENIOR

## CARE UNIT

### Geriatric Psychiatry

The Senior Care Unit at Baptist Beaumont Hospital Behavioral Health Center assists senior adults and their families in understanding and learning to cope with problems related to the aging process.

Aging can present unique mental health needs and life challenges that older adults often find difficult to overcome.

Our goal is to maintain and enhance the patient's self respect during every phase of treatment and to enhance quality of life by helping senior adults maximize their ability to function independently.

Our 30-bed inpatient unit – including available private rooms, an

activity center, day room and courtyard – offers a homelike environment that allows our staff to focus on the individual psychiatric, medical, medication, dietary and social needs of patients.

Our highly trained staff can assist in the diagnosis and treatment of a range of behavioral difficulties including:

- Anxiety Disorders
- Alzheimer's Disease
- Dementia
- Depression
- Paranoia
