CHILDREN'S PSYCHIATRIC TREATMENT SERVICES

Does your child, aged 6-12, have impulsive or defiant behaviors, an inability to concentrate, have extreme or prolonged mood swings, or show physical aggression towards themselves or others?

Seeking professional help for a child is one of the most difficult decisions a parent has to make. Finding help with your child's behavioral health can be intimidating and confusing.

At Baptist Hospitals of Southeast Texas Behavioral Health Center, your child's recovery is our priority. Our team of experts will work with you to create a plan and manage the barriers to you and your child's goals.

"I didn't know who to turn to, but Baptist Hospital was there for me."

Our inpatient care program is provided for children with mental illness who are in need of 24-hour hospitalization. This program is for those children who need structure and intensive care. The program encourages active participation by every member of the family. We also offer a transition to outpatient treatment for those that are ready to step down from our more intensive inpatient program.

The daily activities of all Children's Services are designed to increase problem solving and communication skills and enhance self-esteem.
